

## Cabinet

The Chancellor's Cabinet includes senior administrative and academic leadership; members discuss major initiatives throughout the campus, strategic/current issues facing the campus and UC as a system, and issues of importance to external constituencies and stakeholders.

It is advisory to the Chancellor and provides an opportunity for the campus's senior leadership team to:

- Provide input to the Chancellor in the development of his/her vision to guide the campus, and his/her goals and initiatives;
- Discuss strategic and current critical issues facing the campus—in particular, the Cabinet provides an opportunity to discuss matters in a context in which interrelationships among academic and academic support divisions can be explored;
- Provide input and advice that will inform campus policy decisions as well as the development of campus-wide consultation processes;
- Provide a sounding board for/hear briefings by the Chancellor on his/her activities—including at the Office of the President, Regents, Council of Chancellors, and the State;
- Provide an opportunity for principal officers to give updates or presentations on the principal projects, goals, and key issues facing their division or the campus as a whole, including requests for input and advice on strategy;
- Receive assignments from the Chancellor, including those that involve multiple academic and administrative divisions and have campus-wide impact.

The Chancellor sets the agenda and uses the group to obtain advice and to assign specific responsibility as a result of discussions.
